In response to applicant's amendment dated April 13, 2005. The following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Abe et al (6147942).

The reference shows a multi layer disk reading apparatus comprising: light source generating means 3, reflecting the light beam from the multi layer disk to detect a focusing error signal 5, storing values for providing a predetermined servo data 12, a switching means 11a for providing the stored data or the current servo focusing data 7 based on the focusing signal SO/SC of element 8 and directing the beam to move to a different layer 13.

Claims 1 and 4-10 are allowed.

Claims 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited prior art shows or teaches the first to third values as claimed.

Applicant's arguments with respect to claim 11, and 15-20 have been considered but are moot in view of the new ground(s) of rejection.
